

# **Common Intake Agent Workgroup**

October 19<sup>th</sup> 2005

# **NEW to CIA**

**New changes being made to the CIA  
interface in March 2006.**

- DOB calculates age for a client in the same way as it is when entered directly in to eWiSACWIS.
- Date of referral to be recorded. This currently defaults to the system date.
- CIA-CREATEDBY-ID field to be added (eWiSACWIS Worker ID). If CIA-CREATEDBY-ID is left blank, then it will enter the default CIA Worker ID.

- Increase the length of the narratives from 500 bytes. (to what size?)
- Allow selection of the correct address. Currently the address sent via CIA conflicts with the already entered address in eWiSACWIS.

### Already implemented

- Have the counties notified ASAP when the state side of the CIA is down via e-mail.

**Have your say on how the CIA  
interface should or should not  
work!**
